DETAILED ACTION

REASONS FOR ALLOWANCE

1. Claims 1 – 8 and 16 – 25 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or suggest, either singularly or in combination, at least a seal ring having a plurality of edge portions and a plurality of corner portions, each the edge portion extending between a respective pair of the corner portions, each of the corner portion of the seal ring having approximately straight first and second edges on inner and outer sides thereof that are approximately parallel to each other, and that are sloped at an angle to each of two edge portions located adjacent that corner portion, so each corner portion is free of a sharp corner; and wherein a first width of the metal lines between the first and second edges of each of the corner of portion is wider than a second width of the metal lines at each of the edge portion. Kazuyasu (JP 06-244,405) discloses a seal ring having a plurality of edge portions and a plurality of corner portions, each the edge portion extending between a respective pair of the corner portions and wherein a first width of the metal lines between the first and second edges of each of the corner of portion is wider than a second width of the metal lines at each of the edge portion. However, Kazuyasu does not disclose a seal ring having a plurality of edge portions and a plurality of corner portions, each the edge portion extending between a respective pair of the corner portions, each of the corner portion of the seal ring having approximately straight first and second edges on inner and outer sides thereof that are approximately parallel to each other, and that are sloped at an angle to each of two edge portions located adjacent that corner portion, so each corner portion is free of a sharp corner as set forth in claims 1 and 16.
